

## 5004 Lab 6 Report

### Reflection (What did you learn?)

I learned how to implement a tree as well as how to practice working on given code and driver to write code which works with the given driver.

### Extensions (What extensions are you requesting?)

Modifications to main and some java doc comments.

### Grading Statement (Based on the rubric, what grade do you feel you deserve? Be honest.)

The driver works, it is able to print employees, get size of organization, and print all employees, implemented a abstract tree, as well as get size of organization by gender and salary. Therefore, I think I should receive most of the points for objectives which includes successful implementation of the above.

### Academic integrity statement

I understand that my learning is dependent on individual effort and struggle, and I acknowledge that this assignment is a 100% original work and that I received no other assistance other than what is listed here.

Acknowledgements and assistance received:

I did not use generative AI in any form to create this content and the final content was not adapted from generative AI created content.

I did not view content from any one else's submission including submissions from previous semesters nor am I submitting someone else's previous work in part or in whole.

I am the only creator for this content. All sections are my work and no one else's with the exception being any starter content provided by the instructor. If asked to explain any part of this content, I will be able to.

***By putting your name and date here you acknowledge that all of the above is true and you acknowledge that lying on this form is a violation of academic integrity and will result in no credit on this assignment and possible further repercussions as determined by the Khoury Academic Integrity Committee.***
